## DREDGING UPDATE

The dredge *Twin Lakes* began operating in the entrance channel on November 8, 2016. All systems have been tested and the dredge is capable of operating to its full potential. A density gage was installed, which gives the operator real-time feedback on the quantity of material being dredged versus the amount of water in the slurry.

Unfortunately, shoaling in the entrance persists, so the Port District's dredging consultant (CF Bean of Louisiana) will be onsite again starting Friday, December 2, to provide more training and support. Additional operators will be trained so that there are always backups available. The Harbor Patrol has been conducting daily soundings to assist in developing daily dredging plans and measuring progress.

Dredging has been scheduled for Friday, December 2 through Friday, December 9 while CF Bean remains onsite. There is one planned maintenance day (Wednesday, December 7), and weekend work will end by 3 pm to reduce impacts for beach visitors and Lighted Boat Parade spectators.

Prior to transiting the entrance, mariners are advised to check tide and weather conditions and review the most recent bathymetric survey [online](#).
